

Consulting:

Whether you are in the beginning stages of a project or seeking advice on an existing water treatment process, **Lone Wolf Technologies** understands the urgency and importance of your project. **Lone Wolf Technologies** can offer consulting services that will improve changes in your water treatment efficiency, assist in exploring alternative treatment technologies or examine your current water treatment operation and provide a second opinion.

There is no charge for our initial visit. This visit focuses on finding areas of improvement and cost savings. We begin with the influent water analyses. Then move on to an examination of your equipment, treatment chemistries, operator training, system operational procedures, and treatment efficiency. Once this is completed, we will meet with you to review our findings and recommendations, prioritize them and agree on a plan of action.

A few of the next directions you take might include:

- Complete treatment system overview
- Troubleshooting current problems
 - Treatability testing of new manufacturing process chemicals
 - Treatability testing of new water treatment chemistries
- Reviewing and optimizing water treatment chemistries and dosages
- Automating water treatment chemistries
- Automating water treatment systems
- Reviewing alternate chemicals and technologies to improve treatment efficiency
- Reviewing bids and proposals to assure you are comparing apples to apples
- Assist with developing Standard Operating Procedures
- Operator Training
- Developing Daily Operator Water Testing Log
- Client specific concerns and requests

Regardless of the issues, **Lone Wolf Technologies** treats your concerns as an urgency and will work to a successful solution. Our goal at **Lone Wolf Technologies** is to assist you in maintaining a water treatment program that provides optimal performance, consistent compliance and peace of mind.
